1 Purpose

The objective of the GETCO2 Quarterly KPI Reporting Policy Procedure is to establish an effective and transparent KPI reporting mechanism to comply with ARC requirements and enable centre research and operations oversight. This procedure is intended for Chief Investigators, Node Directors and Node Administrators at the participating organisations of the ARC Centre of Excellence for Green Electrochemical Transformation of Carbon Dioxide (GETCO2). As per the *Collaborative Research Agreement*, the participating organisations are The University of Queensland (UQ), RMIT University, The University of New South Wales, The University of Sydney, The University of Adelaide, and Monash University.

For further information on ARC requirements and reporting, please refer to the [ARC Establishment Toolkit](#) and *The Commonwealth Grant Agreement Between the Commonwealth, represented by the Australian Research Council and The University of Queensland*.

2 Scope

This procedure is mandatory and applies to all Chief Investigators, Node Directors and Node Administrators at participating organisations of GETCO2 as per the *Collaborative Research Agreement*.

3 Procedure

- 1) Node Administrators support Chief Investigators of the participating organisations to prepare KPI reports every quarter.
- 2) The Node Administrator for each organisation inputs the data in the GETCO2 Record Management System ([GETCO2 Hub](#)) within the agreed timeframe (see appendix 1).
- 3) The UQ Node Administrator and GETCO2 Chief Operations Officer review the provided data based on the KPI Reporting Requirements (see section 6).
- 4) The UQ Node Administrator may request further information on data that is incomplete or inconsistent.
- 5) The UQ Node Administrator and Chief Operating Officer collate all data from the quarterly KPI reports and prepare the End of Year KPI Reports to the ARC.

4 Monitoring and Review

The UQ Node Administrator and GETCO2 Chief Operations Officer review the KPI reports provided by the Chief Investigators to ensure that all requirements are met. Adjustments to reporting requirements and due dates will be reviewed annually or upon request by stakeholders, including the participating organisations and the ARC.

5 Recording and Reporting

- KPI reports and other records related to the personnel and activities of the grant provided by the participating organisations are stored electronically in a secure folder at the UQ Node and in the Australian Data Warehouse for the Zoho Creator Platform.
- Copies of these records will be provided to the Commonwealth upon request.
- The records will be kept for 7 years after the 7 years duration of the Centre, and copies will be provided to the Commonwealth upon request.

6 KPI Reporting Requirements

- The KPI Reporting Template must be used to prepare the quarterly KPI reports (see Appendix 2).
- The quarterly KPI reports must contain information on all reportable activities for the relevant reporting period. Under ARC Centre of Excellence guidelines, Associate Investigators are not formally recognised as participants by the ARC. Therefore, their activities should only be reported if they meet one or more of the following criteria:
 - The activity is conducted in direct collaboration with a Chief Investigator; or
 - The Associate Investigator is an active member of a Chief Investigator's research group, contributing to Centre-related work; or
 - The Associate Investigator is presenting on work that is directly related to or produced under the Centre's program of research.

Activities that fall outside of the above conditions should not be included in the KPI Report. This ensures consistency with ARC reporting requirements and maintains the integrity of the Centre's KPIs.
